REQUIREMENTS TO PASS TYPE B HOME INSPECTION

- 1) 1A-10BC **ABC** fire extinguisher mounted in kitchen area. Kitchen stove should not be located between you and the extinguisher. It should be visible from anywhere in the kitchen.
- 2) A smoke detector on each level mounted on the ceiling no closer than 4 inches to any wall.

OR

Mounted on a wall no closer than 4 inches or farther than 12 inches from the ceiling.

A detector mounted on a peaked or sloped ceiling shall not be closer than 4 inches to the peak or high side of the ceiling, or farther than 3 feet.

The detector in the basement should be as close as possible to the bottom of the basement stairs. Detectors should not be located in a corner, but out in the open to avoid dead air space.

- 3) Locate the detector on each level in an area with adequate air flow.
The first floor detector should not be in the kitchen. It should be near the middle of the house and just outside the doorway into the kitchen.
The second floor detector should be in the upstairs hallway between the bedrooms.
- 4) Nothing should be stored within 3 feet of the furnace or hot water tank.
- 5) A diagram of each floor showing exits from the home and escape routes to the exits for an evacuation plan. It should include a safe meeting place outside the home and in front but not directly in front of the home. It should include the address of the neighboring home in front of which everyone will assemble.
- 6) Anyone providing care for children ages 6 and under should cover all unused electrical outlets with plastic covers.
- 7) Remove all poisons or corrosives from the lower cabinets and under the sink, or secure them with child proof locks.
- 8) All homes must have a telephone for the home, not just a cell phone.
- 9) All homes should be ready for immediate occupancy and should include furniture.
- 10) All **pets must be** secured at the inspector's discretion.
